

I've recently subsribed to XM radio and I think it's awesome. No other stations give you traffic and weather updates. This is very useful when you travel. I strongly oppose HR4026! This is ridiculous. The white house should be worrying about our soldiers, but instead they worry about a satellite radio. I'm pretty sure some of them own an XM radio.This is the 20th century, technology has come a long way to all of a sudden forbid traffic and weather updates that are useful to many of us who are always on the road and have no time to listen to the news at home.
